

Farm Grid

Introduction

Many rural farmers lack resources to get quality education for their children because of high tuition or total lack of school in their area.

Farm Grid came up with an idea to build a free grade school with equipped computer room in one of such areas and see how it goes.

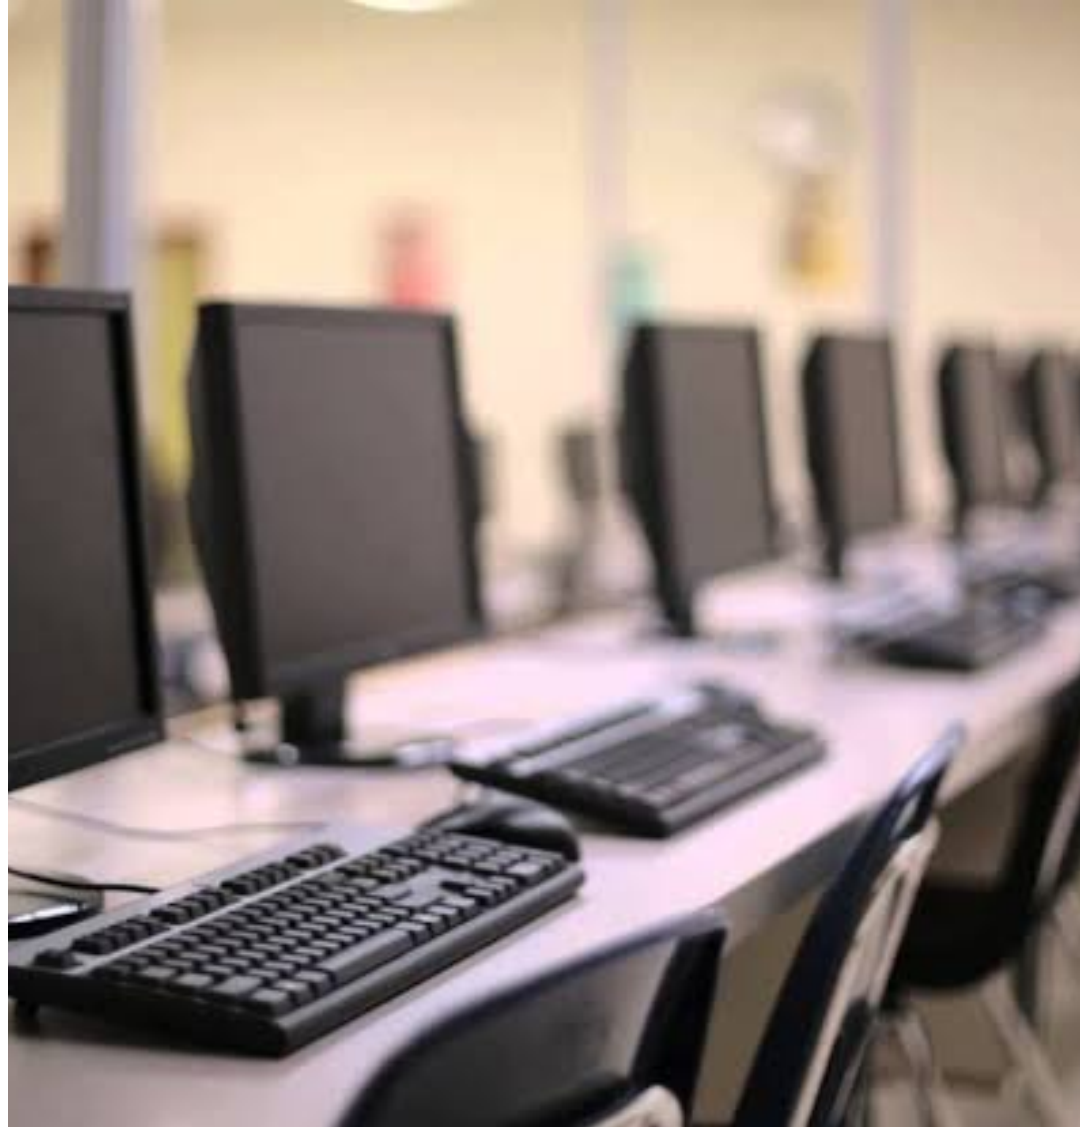

Statement of Problem

- Orphans and less privileged children in some rural areas are deprived of quality education
- Some rural areas lack schools
- Tuition is a problem for many rural farmers
- There is a need to introduce these children to computer and robotics

Our Solution

- Establish free primary (grade) school in the area for orphans and less privileged children
- Attach and equip a computer lab.
- Employ and pay qualified staff

Our Plan

- To build a school block that houses 6 class rooms and a large administrative office with 10 computers
- Employ 6 teachers, 1 administrator and 1 security officer
- To extend this gesture to as many rural areas as possible

Traction

4 plots of land has been donated for this project

Ask

We Ask	Activities
\$85,000 + Partnership	School block School fence and gate Salary 10 computers Fixed deposit Miscellaneous

Breakdown

Item	Amount in Dollar	Amount in Naira
School block	9,000	3,150,000
Fence and gate	2, 000	700,000
10 computers	1,600	560,000
Salary(as will be generated from fixed deposit investment)	71,400	24,990,000
Miscellaneous	1,000	350,000

Summary

84% of the fund will be invested as fixed deposit that yields 8% interest per annum

84% of \$85, 000 =\$71, 400
8% interest on \$71, 400
=\$5, 712 Per annum

16% of the fund goes into the building and the computers

\$5, 712 will pay the staff right there in the rural area yearly

About us

Farm Grid is a charity organization that promotes One health by offering free services to livestock and crop farmers in the rural areas of Africa
